|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Hazard statement</b>                          | Causes skin irritation. Toxic to aquatic life. Toxic to aquatic life with long lasting effects.                                                                                                                                                      |
| <b>Precautionary statement</b>                   |                                                                                                                                                                                                                                                      |
| <b>Prevention</b>                                | Wash thoroughly after handling. Avoid release to the environment. Wear protective gloves.                                                                                                                                                            |
| <b>Response</b>                                  | IF ON SKIN: Wash with plenty of water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. Collect spillage.                                                                           |
| <b>Storage</b>                                   | Store away from incompatible materials.                                                                                                                                                                                                              |
| <b>Disposal</b>                                  | Dispose of contents/container in accordance with local/regional/national/international regulations.                                                                                                                                                  |
| <b>Hazard(s) not otherwise classified (HNOC)</b> | None known.                                                                                                                                                                                                                                          |
| <b>Supplemental information</b>                  | 100% of the substance consists of component(s) of unknown acute oral toxicity. 100% of the substance consists of component(s) of unknown acute dermal toxicity. 100% of the substance consists of component(s) of unknown acute inhalation toxicity. |

### 3. COMPOSITION/INFORMATION ON INGREDIENTS

#### Substances

| Chemical name       | Common name and synonyms                                                                                                            | CAS number | %   |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------|------------|-----|
| CITRONELLYL ACETATE | 3,7-dimethyl-6-octen-1-yl ethanoate<br>citronellyl ethanoate<br>3,7- dimethyloct-6-enyl acetate<br>1-acetoxy-3,7-dimethyl oct-6-ene | 150-84-5   | 100 |

### 4. FIRST-AID MEASURES

|                                                                               |                                                                                                                                                                                                                                                       |
|-------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Inhalation</b>                                                             | If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. For breathing difficulties, oxygen may be necessary. Call a physician if symptoms develop or persist.                                        |
| <b>Skin contact</b>                                                           | Take off immediately all contaminated clothing. Get medical attention if irritation develops and persists. Wash skin thoroughly with soap and water for several minutes.                                                                              |
| <b>Eye contact</b>                                                            | Remove contact lenses, if present and easy to do. Get medical attention if irritation develops and persists. Promptly wash eyes with plenty of water while lifting the eye lids.                                                                      |
| <b>Ingestion</b>                                                              | Call a physician or poison control center immediately. If swallowed, rinse mouth with water (only if the person is conscious). Do not induce vomiting. If vomiting occurs, the head should be kept low so that stomach vomit doesn't enter the lungs. |
| <b>Most important symptoms/effects, acute and delayed</b>                     | Skin irritation. May cause redness and pain.                                                                                                                                                                                                          |
| <b>Indication of immediate medical attention and special treatment needed</b> | Not available.                                                                                                                                                                                                                                        |
| <b>General information</b>                                                    | Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance.                                                                             |

### 5. FIRE-FIGHTING MEASURES

|                                       |                                                                    |
|---------------------------------------|--------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>   | Water spray, fog, CO2, dry chemical, or alcohol resistant foam.    |
| <b>Unsuitable extinguishing media</b> | Do not use a solid water stream as it may scatter and spread fire. |

## SAFETY DATA SHEET

### 502600 CITRONELLYL ACETATE NATURAL

Revision Date: 02-16-2024

Page 3 of 11

Version # 04

Print Date: 02-16-2024

**Specific hazards arising from the chemical**

Fire may produce irritating, corrosive and/or toxic gases.

**Special protective equipment and precautions for firefighters**

Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Structural firefighters protective clothing will only provide limited protection. Wear self-contained breathing apparatus with a full facepiece operated in the positive pressure demand mode when fighting fires.

**Fire fighting equipment/instructions**

In case of fire and/or explosion do not breathe fumes. Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. Water runoff can cause environmental damage. Ventilate closed spaces before entering them. Keep run-off water out of sewers and water sources. Dike for water control.

**Specific methods**

Use standard firefighting procedures and consider the hazards of other involved materials.

**General fire hazards**

Static charges generated by emptying package in or near flammable vapor may cause flash fire.

## 6. ACCIDENTAL RELEASE MEASURES

**Personal precautions, protective equipment and emergency procedures**

Eliminate all sources of ignition. Avoid contact with skin or inhalation of spillage, dust or vapor. Keep unnecessary personnel away. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them.

**Methods and materials for containment and cleaning up**

Collect and dispose of spillage as indicated in section 13 of the SDS.

Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb with inert absorbent such as dry clay, sand or diatomaceous earth, commercial sorbents, or recover using pumps. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area).

Never return spills in original containers for re-use. This material and its container must be disposed of as hazardous waste. Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

**Environmental precautions**

Retain and dispose of contaminated wash water. Avoid release to the environment. Contact local authorities in case of spillage to drain/aquatic environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water.

## 7. HANDLING AND STORAGE

**Precautions for safe handling**

Do not handle or store near an open flame, heat or other sources of ignition. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Avoid breathing vapor. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wash thoroughly after handling.

**Conditions for safe storage, including any incompatibilities**

Keep container closed. Handle containers with care. Open slowly in order to control possible pressure release. Store in a cool, well-ventilated area.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Occupational exposure limits**

This substance has no PEL, TLV, or other recommended exposure limit.

#### 10. STABILITY AND REACTIVITY

|                                           |                                                                                               |
|-------------------------------------------|-----------------------------------------------------------------------------------------------|
| <b>Reactivity</b>                         | The product is stable and non-reactive under normal conditions of use, storage and transport. |
| <b>Chemical stability</b>                 | Material is stable under normal conditions.                                                   |
| <b>Possibility of hazardous reactions</b> | No dangerous reaction known under conditions of normal use.                                   |
| <b>Conditions to avoid</b>                | Avoid temperatures exceeding the flash point. Contact with incompatible materials.            |
| <b>Incompatible materials</b>             | Strong oxidizing agents.                                                                      |
| <b>Hazardous decomposition products</b>   | No hazardous decomposition products if stored and handled as indicated.                       |

#### 11. TOXICOLOGICAL INFORMATION

##### Information on likely routes of exposure

|                     |                                                                                      |
|---------------------|--------------------------------------------------------------------------------------|
| <b>Inhalation</b>   | Knowledge about health hazard is incomplete.                                         |
| <b>Skin contact</b> | Causes skin irritation.                                                              |
| <b>Eye contact</b>  | Direct contact with eyes may cause temporary irritation. Causes mild eye irritation. |
| <b>Ingestion</b>    | Knowledge about health hazard is incomplete.                                         |

**Symptoms related to the physical, chemical and toxicological characteristics** Skin irritation. May cause redness and pain.

##### Information on toxicological effects

|                                  |                                                                                                                                                                                             |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Acute toxicity</b>            | Not known.                                                                                                                                                                                  |
| <b>Skin corrosion/irritation</b> | Causes skin irritation.<br>Rabbit, Primary Skin Irritation - Irritating<br>Human Maximization Test - Not a sensitizer<br>Species: rabbit<br>Result: Irritant.<br>Method: OECD Guideline 404 |

**Serious eye damage/eye irritation** Direct contact with eyes may cause temporary irritation.  
Rabbit, Eye Irritation - Nonirritating  
Species: rabbit  
Result: non-irritant  
Method: OECD Guideline 405

Version # 04

Print Date: 02-16-2024

#### Respiratory or skin sensitization

**Respiratory sensitization** Due to partial or complete lack of data the classification is not possible.

**Skin sensitization** Due to partial or complete lack of data the classification is not possible.  
Open epicutaneous test (OET)  
Species: guinea pig  
Result: Non-sensitizing.

**Germ cell mutagenicity** Due to partial or complete lack of data the classification is not possible.

**Carcinogenicity** Due to partial or complete lack of data the classification is not possible.

#### IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

#### OSHA Specifically Regulated Substances (29 CFR 1910.1001-1053)

Not listed.

#### US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

**Reproductive toxicity** Due to partial or complete lack of data the classification is not possible.

**Specific target organ toxicity - single exposure** Due to partial or complete lack of data the classification is not possible.

**Specific target organ toxicity - repeated exposure** Due to partial or complete lack of data the classification is not possible.

**Aspiration hazard** Due to partial or complete lack of data the classification is not possible.

## 12. ECOLOGICAL INFORMATION

**Ecotoxicity** Toxic to aquatic life with long lasting effects.

Hydrolysis

Test method: OECD Guideline 111 (abiotic)

pH4

Half-life: 4,101 h (20 °C)

Test method: OECD Guideline 111 (abiotic)

pH4

Half-life: 2,523 h (25 °C)

Test method: OECD Guideline 111 (abiotic)

pH7

Half-life: 8,191 h (20 °C)

Test method: OECD Guideline 111 (abiotic)

pH7

Half-life: 4,905 h (25 °C)

Test method: OECD Guideline 111 (abiotic)

pH9

Half-life: 337 h (20 °C)

Test method: OECD Guideline 111 (abiotic)

pH9

Half-life: 185 h (25 °C)

| <b>Other adverse effects</b>         | No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.                                                                                         |                           |

### 13. DISPOSAL CONSIDERATIONS

|                                              |                                                                                                                                                                                                                                                                                                                     |
|----------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Disposal instructions</b>                 | Do not discharge into drains, water courses or onto the ground. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations. |
| <b>Local disposal regulations</b>            | Dispose in accordance with all applicable regulations.                                                                                                                                                                                                                                                              |
| <b>Hazardous waste code</b>                  | Not established.                                                                                                                                                                                                                                                                                                    |
| <b>Waste from residues / unused products</b> | Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).                                                                                                                                                     |
| <b>Contaminated packaging</b>                | Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.                                                                                                          |
