Category 4 5.3 % Category 10 2.5 %

Category 5 2.8 % Category 11 See Note box (2)

Category 6 See Note box (1) 8.6 %

Note box:

(1) IFRA would recommend that any material used to impart perfume or flavour in products intended for human ingestion should consist of ingredients that are in compliance with appropriate standards for food and food flavourings in the countries of intended use, depending on the application, taking into account the final product. The IFRA Standards regarding use restriction are based on safety assessments by the Panel of Experts of the Research Institute for Fragrance Materials (RIFM) and are enforced by the IFRA Scientific Committee.

(2) Category 11 includes all non-skin contact or incidental skin contact products. Due to the negligible skin contact from these types of products there is no justification for a restriction of the concentration of this fragrance ingredient in the finished product. It is the ultimate responsibility of our customer to ensure the safety of the final product by further testing if need be.
